Training

Data Science **June 2025 - July 2025**

Techvanto Academy.

- Applied industry workflows to clean, transform, and analyze datasets of **10K–50K+ rows**, improving dataset usability by 95%+ using **exploratory analysis,** preprocessing, **missing-value treatment**, and feature interpretation in Python.
- Implemented ML algorithms such as **Decision Trees, Random Forest, K-Means**, PCA, improving model performance through tuning, **achieving ~90–95% accuracy** and reducing prediction errors by 30–40% (RMSE/MAE) across supervised and unsupervised tasks.
- Delivered a capstone project demonstrating **85%+ forecast reliability**, supported by metrics**, visual dashboards**, and structured presentations, showcasing insight communication, model justification, and practical business interpretation for practical outcomes.

Projects

Global Temperature change Analysis & Forecasting | *Python, Data Visualization, ML* **Nov 2024 - Dec 2024**

- Analyzed 6-decade FAO climate measurements (1961–2019) to quantify global warming severity using regional variations, month-level deviations, and long-term environmental risk assessment based on statistical anomaly profiling.
- It Developed a scalable forecasting architecture by converting 9,656 raw readings into 150K+ time-series observations, driving pattern visualization and future estimation using regression models, comparative heat maps, and multi-region analytics.
- Projected a temperature increase from 1.33°C (2023) → ~2.03°C (2050), exposing early breach of the 1.5°C sustainability limit, reinforcing mitigation urgency for policymakers through evidence-driven findings and accelerating data-backed climate awareness.

Credit Card Fraud Detection | *Python, Feature Engineering, Predictive Analysis, Seaborn* **Feb 2021 - Mar 2023**

- Designed Built fraud detection model on 284K transactions with feature engineering on imbalanced data (0.17% fraud transaction)
- Applied SMOTE and trained Logistic Regression, Random Forest, XGBoost using key metrics.
- Achieved AUC 0.978 with ~90% recall, enabling real-time fraud detection.

Certifications

Cloud Computing **Nov 2025**

NPTEL — Certificate Link

Computer Communication **Dec 2024**

Coursera — Certificate Link

ChatGPT-4 Prompt Engineering **Aug 2025**

Infosys Springboard — Certificate Link

Technical Skills

Languages: C++, C, Python, Java, JavaScript

Technologies/Frameworks: React JS, Node JS, Git, GitHub, Ubuntu

Data & Analytics: SQL, Excel, PowerBI

Skills: Data Structures and Algorithms, Problem-Solving, Data Analytics,

Education

Lovely Professional University Punjab **2023 – 2027**

Computer Science and Engineering — CGPA: 8.06 *Jalandhar, Punjab*

Sant Kabir Inter College **2021 – 2022**

12th with Science — Percentage: 88.6% *Mau, Uttar Pradesh*

Sant Kabir Inter College **2019 – 2020**

10th with Science — Percentage: 90.8% *Mau, Uttar Pradesh*
